

Lecture No. (One hour each)	Content
1	Introduction to Farm machinery
2-6	Mechanical power transmission and power take-off drives
7-18	Design of Seedbed making implements including primary, secondary tillage and combination tillage implements
19-25	Design of planting equipment i.e. seeders, planters and transplanters
26-30	Design of fertilizer and granular pesticide application equipment
31-37	Design of liquid chemical application units both manual knapsack sprayer and tractor drawn boom type sprayer
37-42	Design harvesting equipment for cereal crops both self propelled walk behind and tractor drawn types
43-47	Design of harvesters for root crops such as potato, onion and groundnut
48-53	Design of threshers such as spike tooth type, rasp bar type and wireloop type for cereal crops and pulses
54-56	Design of farm transport equipment such as trailers
