

Subject Name: Analytical Biochemistry lab

Subject No: BT39201

Prerequisite: Biochemistry (BT20203)

Objective: To provide hands-on training on various analytical tools and techniques used in Biotechnology. The aim of this laboratory course is to make students competent for handling sophisticated instruments used in basic and applied research across academia and industry.

LTP- 0-0-3

Credit- 2

Content:

1. Introduction about this laboratory- 3 hr
2. Spectrophotometry, Spectrofluorometry - 6 hr
3. High performance thin layer chromatography (HPTLC) - 6 hr
4. High performance liquid chromatography (HPLC) - 6 hr
5. Gas chromatography (GC)- 6 hr
6. Gel Electrophoresis-DNA, Gel Electrophoresis-Protein - 6 hr
7. Demonstration on Centrifugation, Rotary evaporator & Lyophilizer, Vacuum centrifugal concentrator/evaporator - 6 hr
8. Demonstration on β -Counter and γ -Counter- 3hr

Text Book :

Wilson And Walkers. Principles and Techniques Of Biochemistry And Molecular Biology 8Ed (2018)
