

SYLLABUS :-

Name of the subject Geomatics Practice(New Number) 2. L-T-P 0-0-3 3. Credits 2
4. Name of the Department Civil Engineering Department 5. Status of the subject
(a) Specify the Session, Semester: (b) Please specify the level of the subject:
UG (c) Whether the subject will be offered as core or elective: Core (d) The
semester in which the subject will be offered: Spring (e) Name of the programme
in whose curricula this subject will be included: B.Tech. in Civil Engg. 6.
Prerequisites for the subject, if any Geomatics 7. Objectives The students
completing this course would acquire knowledge of handling basic and advanced
survey instruments such as Theodolite, Tacheometry, Total Station and GPS. They
should be able to carry out general field marking for various civil engineering
projects 8. Contents Exp. 1 - Tape and compass traversing: Closed traversing;
determination of the distance between two inaccessible points with a compass.
Exp. 2 - Traversing using plane table surveying Exp. 3 - Levelling: Adjustment
to Dumpy level; differential leveling, and profile leveling; Longitudinal and
cross-sectioning Exp. 4 - Contouring: Block contouring, radial contouring Exp.
5 - Theodolite Traversing - Measurements of horizontal angles; Determination of
elevation of an object Exp. 6 - Tacheometry - Determination of heights and
distances by Tangential Tacheometry Exp. 7 - Total Station - Determination of
distance and difference in elevation between two inaccessible points Exp. 8 -
Mapping using Global Positioning System (GPS)
