

SYLLABUS :-

Inorganic Qualitative Analysis Lab (0-0-3) Qualitative analysis of mixtures containing 4 ionic species (2 cations and 2 anions, or 3 cations and 1 anion). Radicals/ionic species: CO₃²⁻, NO₂⁻, S²⁻, SO₃²⁻, F⁻, Cl⁻, Br⁻, I⁻, NO₃⁻, PO₄³⁻, NH₄⁺, K⁺, Pb²⁺, Cu²⁺, Cd²⁺, Bi³⁺, Sn²⁺, Sb³⁺, Fe³⁺, Al³⁺, Cr³⁺, Zn²⁺, Mn²⁺, Co²⁺, Ni²⁺, Ba²⁺, Sr²⁺, Ca²⁺, Mg²⁺. Mixtures containing one interfering anion, or one insoluble component (such as BaSO₄, SrSO₄, PbSO₄, CaF₂ or Al₂O₃), or combination of anions e.g. CO₃²⁻ and SO₃²⁻, NO₂⁻ and NO₃⁻, Cl⁻ and Br⁻, Cl⁻ and I⁻, Br⁻ and I⁻, NO₃⁻ and Br⁻, NO₃⁻ and I⁻. Spot test analysis. Book: Svehla and Sivasankar. Vogel's Qualitative Inorganic Analysis, 7th Ed, Pearson Education
